REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 17. THE REDCLIFF REVIEW, THURSDAY, SEPT. 13th, 1928 Number 20

Good Football Game With Two Town Teams

Brick & Coal Win From Redcliff By 2 Goals to 1

One day last week employees of the Brick & Coal plant issued a challenge to the Redcliff football club for a friendly game. The challenge was immediately accepted, but when it came to picking the teams it was found that a large percentage of the town team were employees of the Brick Co. and were on the line up for the plant. However as the challenge was accepted officials of the team immediately proceeded to pick up a team the game. It was played last Saturday afternoon and resulted in a win for the Brick & Coal by 2 goals to 1.

The game was a good one from the spectators point of view as it was close and exciting. It also showed that Redcliff has two fairl ygol teams in town at the present time, man yof whom are recent arrivals. If the 22 men who played are here next spring Redcliff should have no trouble picking a winning team for the local league.

An amusing incident happened when the game was under way about twenty minutes. G. Davies couldn't figure out why it was that two or three men were after him every time he went for the ball, so he appealed to the referee to have a check up of the players. The check-up showed that there were 12 players on the Brick pant line up and only 10 kicking for Redcliff. Alf Dutton was then transferred to the Redcliff side. This made the play more even but was not yet enough to win the game for Redcliff.

The crowd was not as large as it should have been, but this was due, no doubt, to the cold and un pleasant weather. We should have another of these games yet this season.

SHOOTING SEASON FOR DUCKS OPENS SEPT. 15

The shooting season for ducks and geese opens Sept. 15th in thne part of Alberta south of the Clearwater Athabaska river.

North of this division line the season began Sept. 1st. Sportsmen are anticipating a very good season in both this eary, for from all observations ducks are particularly plentiful.

Acording to the game regulations effective in Alberta the bag limit for ducks is 20 a day and 200 a season, and for geese 15 a day. The season closes December 14th.

The season for Hungarian partridge is from Oct. 1st until Nov. 30th and the bag limit is 15 a day.

WHEAT POOL BULLETIN

The new Alberta Wheat Pool terminal will be taken over by the Alberta Pool organization some time during the later part of this month. The new terminal which has a capacity of 2 1-2 million bushels, is the largest and most modern elevator on the coast. There will be no ceremony in connection with the opening of the new structure.

The Albtrta Wheat Pool is paying farm storage this year. One cent a bushel will be paid on wheat kept back until Dec. 15th and an additional one cent for wheat delivered after Jan. 15th Two cents per bushel ist the maximum farm storage allowed.

The total handlings for the 160 Alberta Wheat Pool elevators last year was 27,350,000 bushels. This year the pol has 300 local elevators. To participate in the Pool Elevator excess profits. Pool members must deliver their grain to Pool houses or chip direct to Pool terminals and send bill of lading to the Pol Elevator head office.

Premier Bracken is making an air trip from Winnipeg to Calgary today.

Prairie Fire Gets Into Grain Field

Burns 100 Stooks Belonging to Beattie & Rutherford

A prairie fire which started along the railroad track a few miles west of town yesteday gave formers of the district a bad scare. It spread rapidly and got into a grain field belonging to J. Beattie and Neil Rutherford. Before it was put out it had burned about 100 fine wheat stooks. The fire also spread in other directions and for a time T. Bell's grain fields were also in dange.

Section men and farmers of the district had to work hard for a few hours to get the fire under control. It is not known how the fire started.

Alberta Heads in The Yield Estimats

Estimated The Province will Average 28 Bushels to Acre

A wheat crop of 534, 621,412 bushels from 23,098,505 acres is estimated for this season's yield in the prairie provinces.

According to the estimate Manitoba will have an average yield of 22 bushels per acre and a total crop of 57,202,750 bushels from 2,600,125 acres; The average yield for Saskatchewan is placed at 21 bushels per acre and a total crop of 389,667,934 bushels from 18,730,854 acres, while the Alberta estimate is 28 bushels to the acre with a total yield of 187,810,728 bushels from 6,707,526 acres.

Ordinary revenue of the Dominion of Canada increased by $14,350,291 during the five months of the fiscal year ended Aug. 31st last, as compared with the corresponding period hat year.

SUMMERFALLOW GOES 47 BUS. TO THE ACRE

Some idea of the splendid crops around Bingville was gained from Mr. Teewinkle of that district who was in town on Tuesday on business. Mr. Teewinkle bought a combine this fall and has been using it to harvest his crop. Already he has cut and threshed about 400 acres and he has 200 acres more to harvest. One field of sumer fallow went 47 bushels to the acre. The balance is averaging from 27 to 30 bushels and it is all grading No. 2. Mr Bertwhistle of the same district has harvested 600 acres with a combine. It also is showing a heavy yield and the grain is grading well.

NEW SUPERINTENDENT, THE IMPERIAL BANK

Mr.Gordon D. Ritchis, has been appointed western superintendent for the Imperial bank of Caada, with headquarters in Winipeg. Mr. Ritchie is well known in the west. He joined the staff of the bank in 1903 and seven years later was transfered to Brandon, Man., and continuel in the west util 1925. He was attached to wester headquarters in Winnipeg in 1919, and became supervisor of branches for Saskatchewan and Manitoba three years later. Mr. Ritchie is now in Winnipeg as western superintendent with authority over all branches from Port Arthur to Vancouver.

"Diredevil's Reward," a Fox Films production starring Tom Mix, which will show at the Cameo Friday, is a colorful story of a Texas ranger who is compelled to hold up a stage in order to foil the efforts of a gang of bandits. Acused and betrayed by the girl he has grown to love, Mix stages a smashing come back and proves to her his unquestionable honesty.

LOCAL CHINAMAN WAS KIDNAPPED IN CHINA

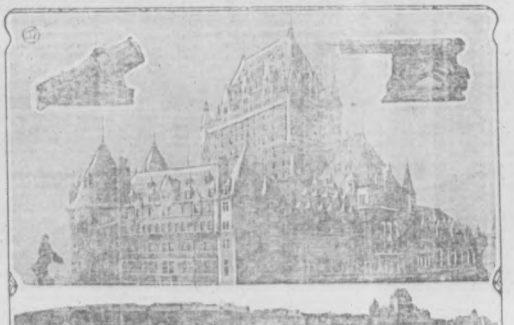

Leung King Cheng, one of the first Chinamen to start a laundry in Redcliff 15 years ago, under he name of Leung Bros., has just returned from Winnipeg where he has been undergoing treatment for a severe attack of rheumatism. Four or five years ago Leung took a trip home to China. Immediately on landing there he was kidnapped by some bandits and held for a ransom, his captors demanding a large sum of money for his release. While a captivt he was kept in a damp, filthy cellar and it was while he was confined there he contracted rheumatism Leug paid the price demanded and shortly after returned to Canada badly crippled up. Ever since he has been undergoing treatment without success. He is now contemplating returning to China. His son is still running the laundyr business here.

"MADE IN CANADA" SALE, SEPT. 19th & 20th

The Ladies' Aid of Gordon Memorial church are putting on a big "Made in Canada" sale in Gordon Memorial on Wednesday and Thursday, Spt. 19th & 20th. At this sal goods, donated by different manufacturers thuorghout Canada, will be offered for sale. These goods will oconsist of hardware, woodenware, groceries, dry goods, toilet articles, notions sand glassware. The sale will be carried on afternoon and evening of each day. Each evening there will be special programs and addresses will be delivered byDr. Gershaw, M.P. and Mr. Hector Lang M. L. A. Lunch will be served each afternoon and evening.

It is rumored that a scheme is on foot to bring two million British settlers to Canada under the Imperial government.

A BRAVE ATTACK AND A BRAVE DEFENCE

Upper—The Chateau Frontenac, famous Quebec hostlry, on whose wall a tablet in memory of the officers of the Royal Fusiliers has been erected. Lower—A panorama of the ancient city of Quebec, showing the Chateau Frontenac and the ramparts. Below at the time of the visit of H.M. King to Canada. The attack against Fort-de-Ville was made along the shore behind the massive. Inset—A mortar and cannon used in Quebec at the time of the siege by American troops in the War of Independence in 1775-76.

A memorial to an event of outstanding importance in both Canadian and American history, has been erected on the wall of the Chateau Frontenac in Quebec.

Although many thousands of American tourists annually invade the ancient city and throng the corridors of the great hostelry, it is not often realized that their ancestors once attempted to gain admittance to the city with less success. Early in the War of Independence two forces of American soldiers were despatched against Canada, one under General Richard Montgomery up the Richelieu river to Montreal, and the other under Colonel Benedict Arnold through the wilds of Maine against Quebec. The two armies united their resources before the city of Quebec in mid-December, 1775, and commenced a siege that lasted for 154 days throughout the stunning winter. Montgomery had carried all before him and captured the forts of St. Johns and Chambly, and occupied Montreal and Three Rivers, so Quebec represented the last stronghold of Imperialism against the British. Arnold had encountered great difficulty in his march, and his expedition was depleted by almost a third of its members.

The defense of Quebec was under General Sir Guy Carleton who had a garrison of about 1,500, about equal to the strength of the attackers, composed of a few regulars, including the Seventh Royal Fusiliers, the Royal Emigrants, a Corps of Seamen, and British and French-Canadian Militia.

Early in the morning of December 31, 1775, the chief assault was delivered by the American troops, bravely led by the commanders in person. Montgomery being killed, Arnold severely wounded at Sault-au-Matelot at the other side of the town. The attack was unsuccessful, many prisoners were captured, and the attacking forces thereafter became little more than a blockade, until relief arrived from Great Britain in May, 1776.

The tablet in commemoration of the part taken by the Royal Fusiliers in the defence of the city "throughout the rigors of a Canadian winter, in an active and enterprising enemy" was unveiled on Dominion Day, July 1, in the presence of the Governor General. A detachment of the Royal Fusiliers (City of London, Ontario), with two officers from the parent unit in England, represented the Fusiliers. The arrangements for the Governor General (Charles G. Wynne, secretary of the Province of Canada Rifle Association, and formerly a member of the Royal Fusiliers.

Rev. Matheson Resigns From Gordon Memorial

Rev. Mr. Smith Will be Given a Call to Fill Vacancy

At the evening service at Gordon Memorial last Sunday week, Rev. R. N. Matheson, who has been pastor of the congregation for the past few eyars, officially tendered his resignation. The resignation was accepted with regrets. Mr. Matheson has received a call to the United Church at Kimberly and leaves to take charge of that field some time next month.

The congregation is extnding a call to Rev. Mr. Smith, of Cornation, to take Mr. Matheson's place here. Mr. Smith conductservices here during the time the pulpit was vacant after the removal of Mr. Paton. At that time he was the second choice provided Mr. Matheson had not accepted.

School Organizes A Literary Society

Grade 8 Pupils Take honors in Midsummer Exams.

On Sept. 7th pupils of the High school held a meeting for the purpose of re-organizing the Lit. Society. The following officers were elected:

Hon. Pres.—E. L. Stone.
Pres.—Elsie Frey
Vice Pres.—Ruby Ferns.
Secy.—Evelyn Hall.
Treas.—Jennie Bell.
Editor— Nancy Martin.
Reporter—Jim McDermott.

Of the thirteen pupils who passed the grade 8 examinations in June, the following, having received 75 per cent or more in certain subjects, have succeeded in attaining a place on the honor list, which is the ambitio of all good studnts:

Dan Jensen, honors in three units and an average mark of 77 per cent. Dan also made 74 per cent. in another unit.

Lorna Ferns, honors in two units. Helen Rose honors in 1 unit. Mildred Beattie honogr in 1 unit. Ernest Podesta also made the honor list with 74 per cent. in arithmetic.

Good Attendance at Last Legion Meeting

Will Hold Annual Memorial Service Sunday, Sept. 23

There was a good attendance at the regular monthly meeting of the ocal Legion held last Sunday afternoon, and considerable interest was shown in the several matters up for discussion.

Owing to the removal of J. McElvogue, who held the position of vice-pres., Chas Newsham was appointed to the office.

Messrs. G. N. Pearson, G. Moses and R. Moore were appointed an entertainment committee for the balance of the term. As Secretary A. Orgill had tendered his resignation it was decided to cal for applications to fill the vacancy. Applications for the position will be received by the present secretary up till Sept. 15th.

At the meting it was also decidal to hold the annual memorial service at the cemetery on Sunday, Sept. 23rd. A committee was appointed to make the necessary arrangements. Full particulars will be given in our next isue.

Splendid Concert By Hat Talent

in Gordon Memorial Church last Evening

Messrs. Bullen and Ragnar a delightful concert to Gordon Memorial church last evening. To mention some names and omit others would not be quite fair because every member was kindly appreciated by the audience. The program opened and closed with part songs by Mr. Bulen's pupils. These choruses were greatly enjoyed. Miss Norma McWain's solo, also the numbers rendered by Jean and Jack Ellis, were, as might be expected, favorites. Miss Hey thorne, Miss Anna Kaus and litle miss Beatrice Elliott all sang very sweetly. Messrs. Godie and Roberts will also be welcomed back to Redcliff at any time. Mr. Ragnar played all the accompaniments and also rendered several piano solos, revealing his rare gifts as a musician. In all the entertainment was one of the very best heard in Redcliff for a long time.

Medicine Hat is fortunate in having two such outstanding musicians as leaders and teachers. Both Mr. Bullen and Mr. Ragnar are expected to take part in the aniversary program on Monday evening, Oct. 1st.

Eternal Vigilance Is the Price Of Safety

Because of the appalling loss of life through motor car accidents, Governments and municipalities are enacting ever more stringent laws governing the use of highways and the operation of automobiles. Laws regulating the speed of driving, governing the use of headlights, compelling cars to come to a full stop before proceeding to cross railway tracks have been passed, while signaling devices, signs, guard rails at curves, embankments, and other danger spots are erected, all with a view to protecting the public.

For the same reason laws are passed and regulations enforced governing the management of factories, mines, operation of railways and ships, laying down conditions under which women and girls may be employed, and stipulating a hundred and one things which must be done to safeguard workers in all departments of industrial life.

According to figures, the correctness of which are vouched for by the Midwest Safety Conference, as reported in a San Francisco paper, there were 24,000 deaths in the United States last year through traffic accidents, and 23,000 deaths through industrial accidents almost all of which were preventable.

But it will be a surprise to many to learn that accidents occurring in the homes of the United States took an even greater toll of life than did traffic accidents, or accidents in industry. Avoidable accidents resulting in death in United States homes in 1927, numbered 27,000, and, according to the report already referred to, "the bathtub and the stepladder were among the deadliest adjuncts of domestic life, and the two combined contributed a large proportion of these 27,000 home fatalities."

Traffic regulation and industrial safety laws are the business of the public as well as of the individual; hence the interest displayed by all governmental authority. Because they are susceptible of public regulation the problem they present, and which fills the newspapers today, should be easier than that of the household fatalities. As the San Francisco paper says, "it is not possible to put the equivalent of a traffic cop into every home to supervise the hanging of draperies, the dusting of walls and the training of the climbing vines. Nor would it be desirable even were it possible to have a uniformed public official handling careless people in and out of slippery bathtubs. The law cannot direct the turning on and off of gas cocks. It cannot keep matches out of the reach of children. It cannot be the keeper of the family medicine chest. It cannot make itself the custodian of the household arsenal and see that unloaded guns are always unloaded. It cannot prevent the starting of stove fires with kerosene,—or the use of gasoline near a lighted lamp or a burning fire."

These and a multitude of other vigilances rest solely with the individual. Until the individual exercises the necessary caution the lurking dangers of the household will continue to take their toll.

Throughout this great land Canadian rest not a week passes but the newspapers tell the terrible story of a calamity in some home, resulting in death and maiming for life, the direct result of downright carelessness. A destructive prairie or forest fire rages because someone neglected to put out a camp fire, or dropped a match, or started burning straw or rubbish without taking necessary precautions. An explosion wrecks a home and takes a toll of life because gasoline was left where it should not have been. A child drinks a cup of lye in mistake for water, and dies or is crippled for life. And so on, and on, and on.

And all the laws, and regulations, and prohibitions that all the Parliaments, and Legislatures, and Municipal Councils in the country may pass cannot stop these tragedies. In the forceful slang of the day "it is up to the individual" to exercise caution, to be vigilant. Only so can the daily loss of life through these accidents in the home, in industry, and on the highways of our country be reduced and practically eliminated. Ninety-nine out of every one hundred of such accidents are preventable. It is for the people to realize this. When they do the accidents will cease; until they do realize it and govern themselves accordingly, sorrow, pain and loss will continue to be a permanent visitor in our midst.

Named After Lindbergh

Canadian Island and Station Will Bear Aviator's Name

Colonel Lindbergh will have the honor of having an islet in British Columbia and a station in Alberta named after him. Paul Lambert, of New York, owns a small island in Scottie Bay, near Nanaimo, B.C., and asked the Geographic Boards of British Columbia and Canada to approve of the name Lindbergh for it. Neither board has objected. They claim as private property he can call it what he likes, as long as it doesn't interfere with present names.

The Dominion Geographic Board received an application from the Canadian National at Winnipeg to approve naming a railway station in Alberta after the famous aviator. The board has given approval.

If a thing must be done there is no time like the present for doing it.

Secured a Homestead

Two Brothers Maintain Long and Lonely Vigil For This Purpose

Determined to die on a homestead near his father's and brother's at Loyalist, Alberta, when the cancelled homestead rights were thrown open to the public at the Dominion Lands Office in Calgary, Cyrus Buxton, 18 years of age, assisted by his brother Paul, 24, kept first place outside the building for an entire week prior to the opening. A blanket was drawn across a corner of the building within a few feet of the entrance and here the brothers slept during their six hours' shifts. They were successful in securing the desired homestead.

Minard's Liniment for falling hair.

Nagg—Did you hear of my father's death? Do you know, he left $50,000?

Yagg—That's nothing. My grandfather left the earth."

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet ,the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggtore.

World's Grain Congress

Will Mark Fiftieth Anniversary Of Coming Of the Railway and Birth Of Prairie Agriculture

The first world's grain congress scheduled for Regina, in 1932, will mark the 50th anniversary of the arrival of the Canadian Pacific Railway and the birth of prairie agriculture, outside of a comparatively small earlier settlement in Manitoba. In outlining steps preliminary to the summoning of the congress, Hon. W. R. Motherwell, Federal Minister of Agriculture, announced: "The proposal to hold a world's grain congress in Canada has been quietly discussed and canvassed by a few enthusiasts in the west for the past two or three years. In the meantime, the pronounced success of the world's poultry congress has stimulated and crystallized the proposed grain congress into possibility and viability."

NEW STRENGTH FOR ALL WEAK GIRLS

Comes From the Rich, Red Blood Made By Dr. Williams' Pink Pills

There must be no guesswork in the treatment of pale, anaemic girls and children. If your daughter is languid, has a pale, sallow complexion, is short of breath after slight exertion or on going up stairs, if she has palpitation of the heart, a poor appetite, or a tendency to faint, she has anaemia—the medical name for poverty of the blood. Any delay in treatment may leave her weak and sickly for the rest of her life. When the blood is thin and watery give Dr. Williams' Pink Pills, coupled with nourishing food and gentle out-of-door exercise. This new, life-giving blood soon comes from a fair use of Dr. Williams' Pink Pills. Increase the appetite, stimulate the heroes and brings a glow of health to pale cheeks. Mrs. Robert Jackson, R.R. No. 6 Shelburne, Ont., praises this medicine for restoring her daughter's health. She says: "When my daughter was nine years old she was so weak and thin that we feared we would lose her. She was very nervous, and going to school seemed too much for her. Often she would have to stay at home for days at a time. At times she would have a very high fever, and the doctor's treatment did not help her. I tried several remedies but with no good results. One day a friend advised me to give her Dr. Williams' Pink Pills, and I did so. It was not very long after she began using the pills that I could see a change for the better. She kept on taking the pills for several months, through them grew into a strong, healthy girl. Since then, if a tonic has been needed at any time, it has always been Dr. Williams' Pink Pills."

The pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Wireless Saved the Situation

Egypt Able To Greet Afghan Ruler With His National Anthem

A very embarrassing situation was averted and Egypt greeted King Amanullah and his queen with proper ceremony upon their arrival from Bombay, thanks to wireless.

A frantic message picked up by the P. and O. liner Rajputana, from an Egyptian operator, bemoaning the fact that Egypt was not acquainted with the Afghan national anthem. The purser had it wirelessed to Port Said, where it was deciphered—note for note—and upon the arrival of the royal pair they were greeted with a perfect rendition of their anthem.

Cheapest Of All Oils.—Considering the quality of Dr. Thomas' Eclectric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada, from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Fort Vermilion Wheat

Wheat Grown Close To Arctic Circle Weighs 64 lbs. To the Bushel

Wheat from Fort Vermilion, 250 miles north of Peace River, weighed 64 pounds to the bushel and graded No. 2 without dockage. It was sent to the Alberta wheat pool by James McGee, a farmer in that district. Although Fort Vermilion is close to the Arctic circle, wheat growing is not new in that area. In 1876, wheat grown at that point won the championship at the Centennial Exhibition at Philadelphia.

Ideal Tourist Camp Of Calgary

The Calgary Automobile Club is planning to equip and operate what they claim will be the most modern automobile tourist camp in Western Canada. The camp will be well lighted and equipped with gas for cooking, water, shower baths, car shelters and other conveniences for the accommodations of motor tourists.

Insist on Minard's Liniment—accept no other.

PILES are quickly Soothed & Healed BY Zam-Buk

British-American Friendship

Chas. M. Schwab Says the British Are the Most Sincere People In the World

In an appeal to abolish the "hands across the sea" sentiment between Great Britain and the United States, Charles M. Schwab said at an English-speaking union luncheon that the two nations are knit together not only sentimentally but actually, and that a large factor in this union is the steel industries of the two countries. He said that Great Britain was the mother of the steel industry, but that the great British precursor, including the Bessemer process, were developed in America.

"I consider the British the sportiest, truest, most sincere people in the world," Mr. Schwab said. "Nobody knows what they have suffered from the great war, and what they are now doing to get back on their feet. I am proud of my British friendship. I have received more honor from Great Britain than from my own country.

"I am not disturbed by the boastful, flamboyant Americans who falsely represent America abroad, and I am not disturbed by our newspapers comes from a fair use of Dr. Williams' Pink Pills, increases the appetite, stimulates the heroes and brings a glow of health to pale cheeks. Mrs. Robert Jackson, R.R. No. 6 Shelburne, Ont., praises this medicine for restoring her daughter's health. She says: "When my daughter was nine years old she was so weak and thin that we feared we would lose her. She was very nervous, and going to school seemed too much for her. Often she would have to stay at home for days at a time. At times she would have a very high fever, and the doctor's treatment did not help her. I tried several remedies but with no good results. One day a friend advised me to give her Dr. Williams' Pink Pills, and I did so. It was not very long after she began using the pills that I could see a change for the better. She kept on taking the pills for several months, through them grew into a strong, healthy girl. Since then, if a tonic has been needed at any time, it has always been Dr. Williams' Pink Pills."

The pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

First Thing Man Exploited

In 1300 B.C. Hittites Had Laws Governing Bees

The bee was probably the first created thing whose labors were exploited by mankind.

In the Hittite code of laws, dated 1300 B.C., punishments for the theft of bees and hives were mentioned. About 4000 B.C. the bee was adopted as the symbol for the King of Lower Egypt. Hieroglyphic bees were found from the First Dynasty down to Roman times, a period of some 4,000 years.

Bee-keeping was regularly practised in Egypt in 2600 B.C.; reliefs exist showing the conformation of the hives—mud structures placed one over the other—and the men engaged in pouring out the honey and sealing it in jars. But thousands of years before this the wild honey was extracted from rocks and trees. It was only a comparatively recent times, some six or seven thousand years ago, that it occurred to man to reduce the bee to slavery.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Increase In Tobacco Production

Production of tobacco in Canada in 1927 totalled 43,916,700 pounds valued at $9,112,974, an increase over 1926 of 15,092,700 pounds in production, and $1,732,798 in value. Last year 44,028 acres were sown to tobacco in Canada or 10,672 acres more than the previous year. Ontario planted 35,650 acres, Quebec 10,018 acres, and British Columbia 360 acres. The average yield per acre was 997 pounds.

WOMAN SO SICK COULD NOT WORK

Helped by Taking Lydia E. Pinkham's Vegetable Compound

Grainland, Sask.—"I am glad that I heard of that good Lydia E. Pinkham's Vegetable Compound and know I will not be without it again. I was so sick that I could not work at all and could not sew on the machine. My aunt told me of Lydia E. Pinkham's Vegetable Compound and now I am telling all of my friends how good it is and I will answer all letters I get from women."—Mrs. Mary Schultes, Grainland, Sask.

Preparing For Trial Flights

Luxurious British Airship Built For London-New York Traffic

From New York, to London in 48 hours, and with all the comforts of the most luxurious ocean liners!

This may sound like a dream of Jules Verne but it will be accomplished this year by the R-100, a British airship, built under direction of Commander C. Dennis Burney, M.P.

The Burney ship, of 5,000,000 cubic feet displacement, has progressed so far that it is expected to be ready for trial flights in July.

American capital has become interested in the R-100 and a Detroit group has been given an option on a substantial interest in the Burney Company with a view of establishing a fleet of six 9,000,000 cubic feet air liners built on the Burney designs and for use in London-New York traffic.

Half of these ships will be built in the United States and half in England with the operating company owned jointly by British and American capital.

The R-100 will carry 100 passengers and ten tons of express freight. It will be able to make the eastward passage in 48 hours and the trip from London to New York via the Azores in 60 hours. The southern route on the westward passage is contemplated to avoid head winds.

If plans for the trans-Atlantic airship company materialize, the R-100 will be used as an experimental ship, followed by the larger dirigibles with capacities for 140 passengers and 20 tons of freight.

The R-100 has been furnished, the staterooms are completed and rugs have already been laid in the dining saloon.

Most Unusual Job

Going Through Hotel Waste Paper Baskets To Retrieve Lost Articles

Waste-paper baskets sifting is an unusual job, but one that is highly important in large hotels. Most lost articles are found in waste-paper baskets, and in some hotels there are people who spend most of their working hours going through the vast quantities of papers and cast-off articles placed in waste-paper baskets by guests. Many thousands of dollars' worth of jewelry, valuable papers and such things as theatre tickets, railroad and steamship tickets and pieces of wearing apparel are discovered every month. One of the most unusual articles found in the world, owned by a guest who wears it as a pendant, was picked up in waste-basket rubbish less than a month ago. Recently, too, there were two $100 bills found in the trash that was sent down from a guest room.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator and it has saved the lives of countless children.

First Elevator In Angora

Another Western Importation Added To Turkey's New Capital

The first elevator has been placed in one of the buildings of Turkey's new capital.

Thus another red-letter day has been added to the series commemorating the construction of the first new house in the erstwhile village, the first turning of the tap of the new water system, the first puff of heat from the first steam radiator and the first switching on of electricity.

But the elevator, latest importation from the West, does no elevating as yet, for the Minister of Hygiene in whose new headquarters it has been installed has not yet been able to find any one in Angora capable of testing and setting it in motion.

Preserves Water Supply

Forests are nature's preservers of water supply. The forest floor, being porous, retains the maximum amount of rainfall. This physical condition combined with the mechanical obstructions of tree roots, retards the rapidity of run-off. Excess water is released gradually and the equilibrium of stream flow is preserved. In like manner the melting of snows in the springtime is delayed by the lower temperatures and shade in the forest, so that the danger of floods is lessened.

Landlady: "You have been here three months and have never paid any rent."

Student: "But you said it would be like home here!"

Landlady: "Well, I hope it is."

Student: "At home I never paid any rent."

Thrift is a state of mind. A man buys a $900 car as an example when he wants a $6,000 car and can afford no car at all.

Are Aids To Scientists

Rats and Monkeys Contribute To Knowledge Of Dietetics

Rats and monkeys are, in their humble way, contributing much to the knowledge of scientists regarding dietetics, says an article in Tit-Bits.

At the famous Lister Institute in London, is to be found a modern "Pied Piper" in the person of Miss Henderson Smith, who has charge of some 500 rats of all ages and sizes, which occupy a regular nursery.

People come from all over the world to see Miss Henderson's charges. They come with shudders of horror at the thought of so many "beasties" in so small a space, but they go away charmed with the little creatures.

You must not imagine that these are ordinary rats. They are nearly all black and white, though some are entirely white with pink eyes. They are tame and friendly, and if they do occasionally give a little bite—it is kindly meant.

The rats and ten monkeys near by are doing extremely important work. They are teaching scientists all about the mystery of the all-important vitamins and are contributing daily to the knowledge of dietetics.

Simple and Sure.—Dr. Thomas' Eclectric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a tonic to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Post Office Has Big Job

The Canadian Post Office Department delivers over 600,000,000 letters, 350,000,000 newspapers, 400,000,000 circulars, and 40,000,000 parcels annually in Canada, according to a report from the Department. This delivery is made through about 12,440 post offices, and over 300,000 rural mail boxes extending over an area of nearly 2,700,000 square miles.

Don't Make a Toy Out of Baby's Babies Have Nerves

By Ruth Brittain

Much of the nervousness in older children can be traced to the over-stimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

WORLD HAPPENINGS BRIEFLY TOLD

Sir Hall Caine, novelist and dramatist, Greeba Castle, Isle of Man, celebrated his 75th birthday recently

Tin has been discovered in Northern Manitoba according to a report received by Premier J. Bracken from a prospector named Vina A. Lacker, of The Pas, Man.

The House of Lords unanimously adopted a resolution presented by Lord Reading that the proposals for the outlawry of war, presented by the U.S., should have prompt and favorable consideration.

Sir Frederick Stupart, director of the meteorological service of Canada, and of the Toronto Observatory, will retire at the end of the year. He had been connected with the service for more than 55 years.

Scandinavians who last year visited Canada and returned to their own country for the winter months, are now returning in large numbers to take up land in Northern Saskatchewan," officials of the Canadian colonization department announce.

New York newspapers say that a new national transportation system, using both aeroplanes and railway trains, which it is hoped will eventually link New York and the Pacific Coast on a 48 to 52-hour schedule, is being planned.

Over $500,000,000 has been paid out by Canadian mines in dividends and bonuses up to the end of 1926. To this British Columbia mines contributed $60,575,606; Ontario silver mines, $96,239,952; Ontario gold mines, $60,546,634, and nickel mines, $94,722,452.

Cheques amounting to over $18,000 have been distributed among beet growers of southern Alberta by the Canadian Sugar Factories, Limited. This represents an additional payment of 50 cents a ton for 1927 beets, bringing the total amount paid for last year's deliveries up to $7 per ton.

Pays Smallest Income Tax

The smallest income tax payment in Canada is believed to have been remitted by a taxpayer in Toronto, whose tax totalled two cents, according to officials of the Federal income tax department. His taxable income war less than $1 and he paid it with a two-cent postage stamp.

Will Open Marble Quarry

Marble found near the Hudson Bay railway north of The Pas is being investigated by a group of Winnipeg men with a view of opening a quarry.

Harry Buss's Back bothered him for over 17 years

Then Gin Pills relieved his pain

Harry H. Buss of Egmont, B.C., suffered from a lame back for over 17 years. Every spring he was laid up from work. He tried many remedies, but could not obtain relief. He was asked to try Gin Pills and immediately obtained relief. Read his letter:

"There is nothing to compare with Gin Pills. I suffered unspeakably with a lame back for over 17 years. I tried almost everything, even to hot poultices. I could not sleep. After taking two and a half boxes of Gin Pills I am at work again and feel fine as a fiddle. I will not be without Gin Pills from now on. I am telling everyone in this settlement who has kidney or back trouble to give Gin Pills a trial. Publish my letter as I would like others to know what great relief Gin Pills gave me."

Pains in the back, constant headaches, swollen joints, painful urination, murky urine, brick dust deposits, scanty or too frequent voiding of urine are all symptoms of kidney trouble. Relieve your suffering and ensure a future free from kidney ailments. Get a box of Gin Pills today. 50c at all druggists. National Drug & Chemical Co. of Canada, Limited, Toronto, Canada. 187

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

We reached Plymouth in the early morning, while it was yet dark. How strange to find our ship suddenly after days and nights of throbbing movement. How eager we were to get ashore to feel our feet at last on English soil.

Our itinerary promised us great things, but who would have imagined an official reception at the hour of 7 a.m. We were scarcely ashore when we found ourselves greeted by the Mayor of Plymouth (Councillor W. H. J. Priest) who warmly bade us welcome to Plymouth and England, awakening that sense of kinship which we were to feel more and more deeply every day of the tour.

Here also we made the acquaintance of Mr. E. A. Weir, organizer of the programme and itinerary, and Mr. D. M. Johnson, European Colonization Manager, of the Canadian National Railways, London. Our programme told us that we were to have landed at Liverpool, but circumstances had ordained that we should have the pleasure, not only of seeing the historic town of Plymouth, but of travelling through some of the most beautiful countryside that the west of England can boast.

We were taken to Plymouth Hoe. We were shown Drake's Island and his game of bowls before going to fight the Spanish Armada. We saw the spot where the Pilgrim Fathers embarked; and the ladies of our party were taken for a private motor tour over the moors of Devon.

We could have had no better introduction to the beauties of the Old Country than our trip from Plymouth to Liverpool, for it took us through Devon, Somerset, Monmouth (by way of the Severn Tunnel), Hereford, Shropshire and Cheshire, unfolding before us a complete panorama of English life—rich rolling lands, quiet towns and villages, bustling industrial cities; and it was fascinating to us as Canadian farmers to note the different breeds of animals that were seen in the fields as we passed into the counties famous for them; they also marked the boundaries! Although it was January, men in many parts were working in the fields preparing the land for spring.

Liverpool was reached in the evening where we found our hotel one of the finest in Europe, with steam heat and running water in every bedroom. Here Mr. Weir explained the objects of our tour and presented each of us with a volume containing much information on markets and descriptions of most of the places we were to visit. The next morning, sharp at nine, in bright sunshine and a crisp air we were on our way to the extensive dock system of the Port of Liverpool, through which passes a third of the ocean-going traffic of the United Kingdom. The docks extend for 7 miles, and our visit was to the most recent addition, the Gladstone Docks, which were opened last year by His Majesty the King. The Gladstone Graving Dock which forms part of it, the largest dry dock in Europe, can accommodate the biggest ships afloat. We were shown through one of the three-storey warehouses of this dock whose combined warehouse capacity 60 acres of storage space. Even the roofs accommodate goods in times of emergency and from them a fine view is obtained a view of the whole Gladstone Docks system. Hundreds of cranes, ships upon ships, and bales of merchandise gave us a vivid impression of the important part that Liverpool plays in the everyday commercial life of Great Britain. One vessel alone was unloading 8,000 tons of frozen Australian mutton, yet this we were told was considered a very small shipment. The entire supply from Australia had brought five times as much in addition to other cargo!

The docks of the Port of Liverpool are under the jurisdiction of the Mersey Docks and Harbour Board, and during our inspection of the Gladstone Docks, we were the guests of this organization.

The great tobacco warehouse was next visited, where we saw storage space for 70,000 hogsheads of tobacco, each valued at about $2,500, the value of the tobacco in bond at one time of our visit being more than one-third of the total value of Canada's wheat crop last year. We were noted with pleasure a large quantity of Canadian tobacco. Outside the building is an incinerator, known as the "King's pipe" where all condemned and spoilt tobacco is destroyed.

We were now taken to the Liverpool Corn Exchange where we saw a spot market and were able to examine the different kinds of grain that come to the British market from other countries. We also visited the main trading hall where British grain dealers gather for direct trading; and completely equipped laboratory for the grading of grains. Before leaving, we were addressed by R. G. Harker, the President of the Exchange, who in an informative talk told us that one-fifth of the wheat imported through the port of Liverpool was Canadian and one half of that was absorbed by the mills of the Liverpool area.

After lunch we paid a flying visit to the cattle lairages at Birkenhead, across the river, where fat and store cattle are received, now mostly from Ireland, the supply of Canadian cattle being practically nil. On our return to Liverpool we had the novel and delightful experience of a reception by Liverpool's Lord Mayor, Miss Margaret Beaven.

(To Be Continued.)

Dense Population

Belgium has the greatest population to the square mile of any European country. The ratio is 658. Great Britain has 391 inhabitants to the square mile. In Germany there are 348, and in France 187.

Her Color Went Black. She Was Frightened To Death

Mrs. Waite, New Brighton, writes: "That deadly indigestion and gastritis, caused by constipation made my color go black. I was frightened to death, and I feel your laxative saved my life. I take them every night now for precaution, and do not fear an attack of constipation poisoning any more."

NEWEST MOTOR VEHICLE

Motorized Baby Carriage Now Being Used In London

The modern world has become accustomed to the idea of motorized industries. Almost everything in the household is now operated by motors —sewing machines, washing machines, dish-washing machines, sweepers operated on the vacuum principle, electric cooking utensils of all kinds, from toasters to coffee percolators, electric feet-warmers, hair curlers and almost countless assortment of other things, all mechanical, operated either by steam or electricity.

But the motorization has affected even the toys of childhood. There are now electric kiddie cars. They were on exhibit recently at the British Industries Show in London. Tiny motorcycles for children were shown. The wheel chair upon which vacationists at spas were propelled down the boardwalk by servants has now been replaced by gasoline engine wheel chairs operated almost like taxicabs.

The most interesting of the exhibits, however, was a line of motorized baby carriages. They ranged from clever baby carriages purchasable for about $100 to the equivalent of Rolls-Royce baby carriages, costing a thousand dollars, and in some special models considerably more. The deluxe models are splendid specimens, in miniature, of the carriage-maker's art, with a single-wheel motor attachment in front. They are already in use, and it is not an uncommon sight in the London parks to see neatly uniformed nurse girls driving babies in the motorized carriages. The speed limit to the carriages is automatically limited to five miles an hour, and the average speed is three miles an hour.

Nurse girls are required to pass a test before they are given licenses to drive the motorized baby carriages. Special traffic regulations will undoubtedly have to be passed, governing the speed and right-of-way regulations as applied to such conveyances, and undoubtedly filling stations for gasoline and oil for the "gramobiles" will make their appearance in the malls and parks to cater to the new type of vehicle.

Crow and Gopher Campaign

Manitoba Department Of Agriculture Offers Prizes Totalling $2,000

The Manitoba Department of Agriculture announces a campaign against crows and gophers in which prizes are offered for the persons sending in the greatest number of legs, eggs and tails to the Chief Game Commissioner. For each gopher tail one point will be reckoned, for each crow's egg two points and for each crow leg four points. The first prize is $100 and minor prizes will bring the whole amount to $2,000.

Eggs must all be taken and gophers and crows all killed not later than September 1, 1928, and within the province of Manitoba.

He: We've knocked a man down. Aren't you going to stop?

She: Oh, that's all right. We'll read about it in the papers.

NEW WHITE STAR LINER LAURENTIC

The new White Star liner "Laurentic," 19,000 tons, completed late in 1927, especially for the St. Lawrence route, which arrived in Montreal on May 8, on her maiden voyage to St. Lawrence ports. With the White Star liner "Alberic" she shares the honor of being the largest cabin liner ever to come up the St. Lawrence to Montreal.

Canadian Game Animals For New Zealand

Pair Of Rocky Mountain Sheep and Pair Of Beaver Shipped To Auckland

One of the happy results of the wild life conservation policy carried out in our national parks by the Department of the Interior is that Canada is now in a position to assist conservationists of other lands. At various times in recent years donations of wild animals have been shipped to points in the United States and other countries.

Recently one pair of beaver and one pair of Rocky Mountain sheep were shipped from Vancouver to the city of Auckland, New Zealand. The beaver were taken in Jasper national park, while the sheep are from the rapidly increasing wild herd in Rocky Mountains National Park.

Every precaution was taken to see that the animals reached their destination in good condition, and on arrival at Auckland they were placed in the Zoological Gardens of that city.

Winnipeg Newspaper Union
Fashions

Neat, Slender and Smart

An individual style at a moderate cost. Graceful fulness is added by pressed plaits at either side of skirt. Tucks at shoulders are decorative. Deep V at front gives vertical line. Design No. 907 employs lovely soft silk crepe in geometric pattern with harmonizing plain silk crepe contrasting. Crepe satin in reverse treatment, novelty woollens, georgette crepe, wool crepe and lightweight woollens are extremely fashionable. Pattern No. 907 is cut in 7 sizes, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3⅝ yards of 40-inch material, with ¼ yard of 27-inch contrasting. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

CANADIANS COMING BACK

More Returning From States Than Are Going Across Border

If the tide of Canadians coming back from the United States to Canada is any measurement of prosperity then that happy condition is to be found right in the Dominion.

O. G. Adams, immigration inspector in charge at Windsor, states decidedly that there are far more Canadians coming back from the United States than there are going across the line.

A more interesting fact made by Mr. Adams is that this reflux of Canadians to Canada is not distinctly a new thing. "It became noticeable four years ago at this point," the federal immigration inspector said.

The Windsor inspector had his last monthly report on his desk, ready to send. "During the last month," he said, "there were 506 Canadian-born citizens returned to this port, who had resided for a period of more than six months or more in the United States."

Another significant feature of this inflow back to Canada is the number of people who were born in England, "Of these 506 last month," Mr. Adams pointed out, "104 were British subjects with Canadian domicile, that is, five years' residence in Canada. On the list are also 41 naturalized Canadians who could prove Canadian domicile."

Mr. Adams said decidedly that 'there are more coming back than are going out."

"Of course," the immigration inspector added, "as long as there is a border, there will be people going back and forward. But it is ridiculous to try to prove that there is a Canadian exodus to the United States. There is no distinct exodus and the figures prove it."

United States immigration officials at Detroit agreed with the Canadian inspector that any distinct influx of Canadians across the border to find employment had long since ceased, and that the trend was now all the other way.

Asking For Federal Grant

Manitoba Applying For $300,000 Standing To Credit Of Province

Application will be made by the Manitoba government* for $300,000 which is approximately the sum that stands at the credit of the province in connection with the grants made by the Dominion government to the provinces years ago for technical education, Hon. R. A. Hoey, minister of education, Manitoba, has announced.

Because of the industrial depression that prevailed at the time the grant was first made Manitoba was not able to take full advantage of it, but conditions have changer now, Mr. Hoey said, and the need for technical instruction, with the industrial development occurring now, was more apparent than ever.

Organize Construction Department

Saskatchewan Wheat Pool Will Supervise Building Of Elevators

A new Construction Department has recently been organized by Saskatchewan Pool Elevators Limited, which will supervise the construction and acquisition of the Pool elevators included in the 1928 building programme as well as the maintenance of the elevators at present existing in the system. The department comprises an engineer, two superintendents and eight foremen in charge of the various districts. Each superintendent is in charge of a division and each division has four districts with a repair foreman for each.

Dutch Immigration

Manitoba Deputy Minister Of Agriculture Going To Holland On Mission

J. H. Evans, deputy minister of agriculture in the Manitoba Government, is leaving for Holland at the invitation of a Dutch emigration organization which is investigating settlement conditions in Manitoba and Western Canada generally.

With L. A. Gibson, head of the dairy branch of the provincial department of agriculture, Mr. Evans will also represent Manitoba at the world's dairy congress to be held in London around the end of June.

If you are anxious to become a prominent citizen locate in a small town.

Better swallow your indignation when you thirst for revenge.

The older the pessimist is the less faith he has in human nature.

New Chemical Discovery

Furfural a Powerful Solvent Made From Oat Hulls

Sit down at the breakfast table, eat your porridge, glance at a magazine and look at your watch to see if you can walk to the 8.15.

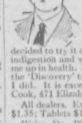

Do you realize that oats furnished the breakfast and helped make the watch and the magazine? asks the New York Herald-Tribune. Moreover, oats may have helped to make your motor car tires, to color your hose and to keep healthy a wounded tree. And that's only a part. What's the answer? Furfural, which is a product of oats and which was one of the hundreds of things tucked away in the booths of the recent chemical exposition that justified the slogan over the New York headquarters of the American Chemical Society: "Chemistry Creates New Competition.

Furfural has a picturesque story. It is a powerful and effective solvent, which can be made from many waste products of the farm. Corn cobs are an excellent source; but, unfortunately, corn cobs are scattered over many farms and the task of bringing them together in one place is expensive.

Oats are another problem. The makers of a brand of oatmeal used to have on their hands some tons of oat hulls every day, which were useful only for fuel, and not very good fuel at that. So the moulting chemist of the company decided that what could be done with corn cobs could be done with oat hulls; furfural in commercial quantities resulted.

That Stomach of Yours!

London, Ont.—"I was in a general rundown state of health. I had indigestion and my stomach was weak and so sore I could not bear to touch it. I got where I did not have any health at all, was not able to follow my usual line of work. I saw Dr. Pierce's Golden Medical Discovery recommended for stomach trouble so I decided to try it and it relieved me of my indigestion and weak stomach and built me up in health. I can highly recommend the 'Discovery' to anyone who suffers as I did. It is excellent."—Mrs. Henry Cook, 471 Elizabeth St.

All dealers. Extra large bottles, liquid $1.35; Tablets $1.35 and $0.65.

Write Dr. Pierce's Invalids Hotel, Buffalo, N. Y., for free advice.

Trade With China

American tourist business in China is having a far-reaching effect upon the dairy industry of British Columbia. The American tourist has carried to the Orient his well known appetite for ice cream and to meet his demand, ice cream is being shipped to Shanghai from Vancouver. There is also growing Oriental demand for Canadian fruits, butter, beef and bacon.

Men who speak before they think have occasion to offer many apologies.

WAS VERY WEAK NERVOUS AND MELANCHOLY

Mrs. Geo. McKenzie, Campbellford, Ont., writes:—"A short time ago I was troubled very badly with my heart and nerves, the cause of it, I think, was my going through the change of life.

"I was very weak and melancholy, and so nervous I could hardly hear to hear a clock ticking, and I did not sleep well.

"I was advised to try so I sent at once for a box; took them and got another, and before they were all gone I felt good, my nerves are fine. I do not mind any noise, and I can sleep well. I cannot recommend them too highly to those suffering as I did."

MILBURN'S HEART AND NERVE PILLS

Price $5c, a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Canada's Basic Industry Sound

Agriculture In Canada Prosperous According To Dominion Statistics

Agriculture is Canada's basic industry, and agriculture is prosperous. According to the Dominion Bureau of Statistics, the Dominion's gross agricultural revenue was $1,389,394,000 in 1923 and $1,736,429,000 in 1927.

This represents an increase of approximately 25 per cent. in five years, and the percentage of increase in the gross agricultural wealth of the country for the same period is only slightly less. The figures are: $6,743,683,000 for 1922, and $7,963,460,000 for 1927.

For all Canada, occupied farm lands increased in value to the extent of $1 an acre in 1927 as compared with 1926 and last year stood at $38 according to the bureau.

Farm lands in British Columbia last year had an average value of $89 an acre, an increase over 1926 of $9 and a figure far beyond that of any other province. Much of British Columbia's arable land is found in fertile valleys where it is cultivated extensively for fruit growing or market gardening. Saskatchewan, the greatest grain province, had an average of $26, with an increase in the year of $1. Ontario increased its average from $62 to $65, and Quebec from $53 to $57.

The increased value and number of livestock is another evidence of prosperity. Canadian horses, cattle, sheep, swine and poultry in 1926 were valued at $747,509,000; in 1927 the figure had gone to $862,097,000, most of the increase being in cattle.

There are no figures in existence to show the extent of farm indebtedness in the Dominion, but apparently in most cases mortgages are being carried without embarrassment. A few years ago there were sections in Western Canada where farms freely were being abandoned to the mortgage companies. Today, after a succession of profitable crops and in a healthier atmosphere of optimism, this condition no longer exists. It is interesting to note that according to the latest census 85.7 per cent. of all Canadian farms were occupied by their owners, showing the numerical insignificance of the tenant class.

Color Matter Of Preference

Brown Shelled Eggs Laid By Common Hens, White By Others

Color of the shells does not affect the food value of eggs. This statement from the poultry department of the University of Wisconsin College of Agriculture may be accepted with certain reservations by housewives who have always insisted on "white eggs" or "brown eggs." Color is entirely a matter of local preference, say the Badger poultry specialists, and as a result eggs of the color most commonly requested on any market are considered by the buyers in that community to be of superior quality.

Brown-shelled eggs are laid by common breeds, as Rhode Island Reds, Rhode Island Reds and Wyandottes, while white-colored eggs are produced by Leghorns, Minorcas and other Mediterranean breeds.

A Good Insurance Risk

Although he carries a blanket public liability insurance policy for $100,000 on any air craft he may be flying, Col. Charles A. Lindbergh has not presented a single claim for damages in the thousands of miles he has flown since he piloted the Spirit of St. Louis from New York to Paris. This has been announced by the insurance company.

Raise Largest Potato Crop

Prisons of Manitoba and Saskatchewan raise two-thirds of the potato crops reported by penal institutions of the dominion. Nearly a third of a million pounds of potatoes are dug up every year at Stoney Mountain, and nearly as many figure in the yield at Prince Albert.

"I saw a dog with five legs the other day."

"Where was the fifth leg?"

"In its mouth!"—Vikingen, Oslo.

W. N. U. 1724

KEEPING CREAM COOL

Putting Cream In Can and Placing In Iced Water

With the arrival of warm weather cream producers who patronize a butter factory are faced with the problem of keeping the cream sweet and clean in flavor until delivery is made. Authorities of the Dairy and Cold Storage Branch, Department of Agriculture, Ottawa, express the view in pamphlet No. 37, entitled "Care of Cream For Buttermaking," that the easiest and best way is to put the cream in an ordinary shotgun can and place it in a tank of iced water immediately after skimming. This pamphlet shows an illustration of a suitable tank capable of holding four cans and sufficient ice and water to keep the cream at a low temperature. The tank is made with a space of four inches on all sides and on the bottom which is filled with planing-mill shavings. The cover is also insulated in a similar manner. The tank is lined with galvanized iron.

This tank, although regarded as a little expensive, is highly recommended on farms where ice is available to be conserved. An ordinary wooden tank makes a fair substitute. Whether tank is of insulated type or plain wood covers are of great importance, as they help to keep down the temperature of the water and cream.

This pamphlet, which can be obtained from the Publications Branch, Department of Agriculture, Ottawa, gives the results of an experiment which shows the great advantage of keeping cream in a proper tank over the usual practice of holding it in the cellar. In the tank cream held for sixty hours at an average temperature of 54 degrees Fahrenheit, developed an acidity of only 0.165 per cent. When kept in a cellar for the same period the average temperature of the cream was 63.7, which allowed the acidity to reach 0.505 per cent. That is to say, cream held in the cellar had three times as much acid as that cooled in the iced water.

Western Alberta Minerals

American Interests To Develop Immense Lead and Zinc Deposits

Some initial work is to be done this summer on the development of an immense lead and zinc deposit in the north country just above the Alberta boundary. Mineral claims in this area are held by a syndicate controlled, it is understood, by Boston interests, and the work proposed for the coming season will consist of sinking experimental shafts with a view to determine definitely the extent and character of the deposit.

A working crew will go north for this purpose soon after navigation opens.

The area to be thus developed is in the Great Slave Lake country about eight miles beyond the Alberta limits. It was prospected before the war and rights acquired from the original prospector by an English concern Owing to wartime conditions, however, no development work was done, and the English holders dropped the claim.

It is said that competent geologists have declared the area to hold the richest body of lead and zinc ore on the continent. Merely as a surface proposition, there is believed to be millions of tons of ore in the deposit and if the tests now about to be made show the deposits to have the expected depth there will be an almost fabulous quantity of the two metals out of which to make a new Eldorado of the north.

Already there are visions of great transportation activity on the northern waterways if the development of the lead and zinc deposit of the top country is proceeded with. Freight will necessarily go in and come out by way of the MacKenzie route, connecting with McMurray and the railways rail line. Incidentally, lead and zinc may force an ultimate extension of the railway into the north, instead of oil.

Just a Report

A Negro preacher had pestered his bishop so much with appeals for help that the bishop finally told him with a tone of finality that he didn't want any more appeals from him.

The next week came another letter from the preacher:—

"Dear bishop,—I assure you this is not an appeal. It is a report. I have no pants."

Important To Beekeepers

The artificial mating of queen bees by which the beekeeper in future can make sure that excellent strains of bees can be perpetuated throughout generations, with a resultant high grade of honey, was revealed by G. H. Gale, at the annual convention of the Manitoba Beekeepers' Association recently. The new discovery, he declared placed the industry on a controllable basis.

JOHN O'BRIEN,

The popular hotel manager of the Canadian National Railways, who will again be in charge of Jasper Park Lodge, Jasper National Park, Alberta. He has been manager of this Rocky Mountain summer resort since 1925.

Will Move More Buffaloes

Wainwright Herd Has Been Increasing Rapidly

It is expected that some 2,100 head of buffaloes, mostly year-olds, will be shipped from the Wainwright Park early in June to the range in the far northern part of Alberta, where, during the past three years several thousand head have been transferred. The former monarchs of the plains have increased so rapidly in their sanctuary at Wainwright that their numbers have far exceeded the carrying capacity of the pasture in the park. Reports from the vicinity of Fort Smith, on the northern boundary of Alberta, indicate that the animals which have been moved are thriving in their new home.

Assist Agricultural Colleges

In England and Wales there are seventeen institutions, receiving grants from the ministry of agriculture. Six of the leading universities are granted money, though in no case does it exceed $35,000. There are five colleges classed as agricultural, one as horticultural, a dairy institute, and a veterinary college. Altogether, the grants amount to $220,000.

Hop Growing In B.C.

The John I. Haas Hop Company, of San Francisco, that now has 100 acres of land in hops at Sardis, B.C., recently acquired additional 80 acres just south of its present holdings, which will be trellised during the coming season. There were approximately 750 tons of hops grown in British Columbia last year, practically all of which have been shipped.

London Has Repair Shop For Lifeboats

Those Put Out Of Commission Around Coast Are Immediately Replaced

In an out-of-the-way corner of the River Thames in the port of London is a lifeboat hospital. The doctors are all old hallors, most of whom have long been connected with the lifeboat service.

The hospital is the repair and store depot of the Royal National Lifeboat Institution. One enters, from the street through a small door, just as though going into an ordinary house, but once inside the similarity ceases, writes W. I. Seymour, in Pearson's Weekly. There are busy yards, machine shops, and store rooms where they keep a stock of everything necessary, from spare lifeboats down to metal polish.

Eight or nine lifeboats fully equipped, are always kept "standing by" ready to be rushed off to replace any that may be put out of action around the coast. Day and night someone is always on duty, prepared to summon all hands to dispatch a lifeboat immediately on receipt of an S.O.S. No station must be kept waiting.

Meantime the damaged lifeboat is being returned to the yard, and on arrival she is immediately overhauled, put into a thorough state of repair, re-equipped, and then put on stock, ready to take her turn again. No new boats are ever kept in stock —they go direct from the builders to the station for which they are intended.

Plant Has Peculiar Seed

Goat's-Beard Equipped With Parachute Which Expands and Contracts

Goat's-Beard, a European plant has a seed that could almost be said to walk. It is equipped with a kind of downy, ribbed parasol, or parachute, by which it drifts for a distance through the air, and by the action of which it is able to move along the ground after it lights. The effect of alternate sunshine and dew on the parachute is to make it expand and contract, so that unless the seed has landed on soil, where it can take hold, the rise will drag it along day after day until a favorable spot is found.

New Homesteads In West

Over a thousand new homesteads were filed in the four western provinces during the months of January and February this year, being 1,036, as compared with 629 for the same two months' period last year. By provinces, Manitoba reports 74 homesteads entries as against 71 last year, Saskatchewan 430 as against 333, Alberta 582 as against 213, and British Columbia 30 against 9.

Romance on C.P.R. Route

The Canadian spring had early influence upon Andrea Hansen, 21, and Neils Christian Nielsen, 23, handsome young Danish immigrant couple who, on arriving at Winnipeg, decided to marry and, with the assistance of the Canadian Pacific Railway Colonization Department officials, did so forthwith.

They had known each other in their homeland, Denmark, for many years, and had even been sweethearts, but on departing for Canada they had harboured no romantic ideas of thoughts of marriage. Travelling as strangers in a strange land, they met and found happiness in each others company during the journey, and furthermore discovered their destinations to be close together. On reaching Winnipeg on their westbound trip, they decided to marry, and the C.P.R. Colonization department officials did the rest.

Rev. N. Damskov, immigration chaplain, aided the groom in securing a special marriage license. His son Victor, a member of the colonization staff, hurriedly procured a fine bouquet from the florists as a gift to the bride from the company. An office adjacent to the Winnipeg immigration hall was cleared and prepared for the occasion. C. A. Vandecoy, head of the colonization department of the railway for Western Canada, volunteered to act as groomsman, and R. G. McNeillie, general agent, agreed, to give the bride away; a group of twenty immigration and company officials gathered,—and the stage was set for the ceremony, the first among newcomers for their season.

"Vil du have Andrea fur din ekta kustra?" asked Rev. N. Damskov.

"Ja!" responded Nielsen.

The chaplain pronounced a special prayer for their guidance as strangers in the new land, charged them to continue faithful to one another, repeated the Lord's prayer, gave the benediction, made the sign of the cross,—and Andrea and Neils Christian were declared man and wife.

They continued their journey westward that afternoon, two out of four hundred settlers, Danes, Dutch, and English, who were travelling at that time with the Canadian Pacific.

NEW POPULAR BEVERAGE

Four Thousand Gallons Of Tomato Juice Consumed Annually At Health Resort

Tomato juice is a popular beverage at French Lick Springs, a well-known health resort, says The Modern Hospital. According to the manager, H. J. Tompkins, the guests consume over four thousand gallons of specially prepared tomato juice each year. In commenting on this, Mr. Tompkins says:

"In late years physicians and dietitians have demonstrated that the juice of the tomato contains many beneficial elements, the chief of which are the three vitamins, A, B and C, and the recently discovered vitamin E, which assists the red blood cells in absorbing iron from the blood. These are necessary for nourishing and strengthening the entire human organism.

"Tomato juice may be served plain or with a pungent seasoning in it" says The Modern Hospital. "One method of preparing it is to pour the juice out of the can and press the pulp through a sieve. Chill and season with salt and pepper. Add lemon juice, tabasco, or Worcestershire sauce, if desired or any other seasoning.

"The use of canned tomato juice has been growing ever since the discovery that the canning process acts as a preservative of vitamin C, which not only prevents scurvy but is necessary for growth and good health. Much of this conservation is due to the acid content of the tomato itself. In addition to vitamin C, tomatoes rank with lettuce and green string beans as a source of vitamins A and B.

"Increasing popularity of the tomato as a source of vitamins is due to the fact that it can be obtained all the year around at a comparatively stable price, and because the labor of preparing it for use is smaller than for almost any other source of the vitamins, a matter of importance in the hospital or health resort."

Will Not Incur Large Debt

But Highway Building In Saskatchewan Will Be Speeded Up

"No one had ever criticized the highway map of the Province and the type of earth road is as good as any built anywhere, and they are well designed," says Hon. Geo. Spence. The Saskatchewan Minister of Highways, Labor and Industry goes on to point out the economical aspect of highway building and gravelling which is being followed this summer. "The Province is in a splendid financial position today. We are going to speed up but will not go head over ears in debt. Colonization is needed, but colonization is a human problem. You can't dump people into the country and not take care of them. Provincial highways had been built to serve points in the East, West, North and South, but no government can build more highways than the people can pay for. They must be built where they will give the greatest service.

"Air survey will be proceeded with this summer; the Dominion government will do this," he said. "They have the equipment but the provincial government will be able to give the information to the people. Tourist traffic by lake and river will be made a study, but until the fullest information is obtained no charts can be made. It would not be safe. The work of constructing the road into the new park in the North is under way. It will be completed in time for the opening of the park in August, and in July will begin the work of removing the loose boulders from the river and Montreal Lake. When this is done it will open up a fine waterway route in the tourist district."

No Argument

A new 5 and 10-cent store had been opened by a man named Cohen. A woman came in one day and selected a toy for which she handed the proprietor a dime.

"Excuse, lady," said Cohen, "but these toys are 15 cents."

"But I thought this was a 5 and 10-cent store," protested the customer.

"Vell, I leave it to you," came the reply; "how much it is, 5 and 10 cents."

Infatuated Youth: Thinking of me, darling?

Weary Girl: Oh, was I laughing? I'm so sorry.

If a man is smart he can catch on and if he is wise he knows when to let go.

The youthful graduate is the only person who knows enough to run the nation successfully.

A sky flecked with small white clouds is sometimes called a mackerel sky.

Crop Planning Of The Farm

Keeping a Record Of What Crops Are Grown In Rotation

In order to keep a record of what crops have been grown each year on all the fields of various parts of the farm, it is desirable to draw each year a small plan of the farm. On this plan may be written the crops which have been obtained. If desired, such additional information may be recorded as dates of ploughing, seeding and harvesting. When this plan is made every year, it facilitates the following without error of any rotation which may be desired. It enables one to learn what fields produce the largest yields of certain crops, providing information to enable the improvement of the rotation along the line of adapting certain crops to soils to which they are suited. Observations may be recorded regarding the presence of weeds in various parts of the farm, where soil drifting has occurred, where manure has been applied and any other points of interest. Above all, such a plan provides a definite record of the results of each year's work on the land and over a period of years is very instructive. Farming is a long-time business and records are necessary if much improvement is likely to be made.

Such a plan may be drawn in a book so that many years' records will be kept easily available. It is possible to use a few pages in the book to make a record of all cash receipts and expenditures and to record once a year an inventory of the value of all the equipment, livestock, and crops on the farm. These records, together with the cropping plan of the farm, give accurate information of each years' progress on the farm and are the best means of studying how to improve the farm business. No commercial enterprise would consider the conduct of its business without yearly records and neither should any farm enterprise. This method of keeping farm records is perhaps the most simple of any system but it gives, undoubtedly, the most fundamental information, and it has the great advantage of being extremely simple and easy to do. If a more elaborate system of accounting is desired, it may be adopted later.

This advice is offered in Bulletin No. 98, entitled "Crop Rotations and Farm Management For the Prairie Provinces," available at the Publications Branch, Department of Agriculture, Ottawa.

The planning of the farm might be made a very enjoyable and instructive task for one of the boys or girls. They are given sufficient instruction in school in mapping to be able to apply this to their own farms.

To Preserve Wood

New Tool Invented For Injection Of Paste Treatment

The practice of giving logs a "hypodermic injection" to preserve them, invented in Germany not long ago, has spread to Britain, and a new tool has been invented to do the work.

The new scientific method is being used to inject into telegraph poles a spreading paste that is said to keep fungi at bay. Many years are said to be added to the pole's life.

This treatment of wood is a step that may lead eventually to complete arrest of decay. If that ideal is accomplished, buildings of wood can be erected that will be as imperishable as structures of stone, brick or steel, while the cost will be much less. The effect will be that of transmuting wood into rock.

Aviation In Western Canada

The developing "air mindedness" in Western Canada was recently illustrated when three passengers arrived at Moose Jaw from Winnipeg by special Western Canada Airways plans for the transaction of business, this being the first business visit ever made by air to Moose Jaw. The plane later flew to Regina and then back to Winnipeg.

A good many things come to the man who is so busy that he has no time to wait.

"Mr. Landlord, I would like to marry one of your daughters."

COOL AND FRAGRANT

Save the Valuable "POKER HANDS"

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XXIV.—Continued.

Then he exalted war and military life. It developed the best in a man, and at this the Major beat his breast, directing his audience to that storehouse of accumulated virtues. Then he appealed to the young men to "get into the game." He painted the glory of it, the freedom of it; the army was the place where a man was a man. The nation's hero was the warrior—mollycoddles have no place in the world, especially with women. There was truth in the old song yet:

"If a lad a lass would marry
He must learn a gun to carry."

Then in a lighter vein the gallant Major hinted at the charm of the French girls and how they admired the Canadians. His manner indicated that but for the presence of the ladies he could tell more.

While he was speaking, Pte. Crowe's hands were never still, nor did his lips cease from trembling. The Major then called for recruits.

"One volunteer," he said, "is better than ten conscripts. Conscription is coming, though"—he gloated over this—"we cannot desert our Army now. If men will not fight of their own accord, there are other methods." The Major unconsciously tapped his sword.

Suddenly it became apparent, even to the Major, that the spirit had gone out of the meeting. His audience sat stony-faced and rigid—the fires had gone out—the current was off. There was no response to his call.

The appeal had not gone home to the men of the north, who love the long trail, with its camp-fires and its peace; brave men, who do their duty from an inward sense, but to whom the thought of force brings not fear but rebellion.

The chairman tried to save the situation by calling for a song, but something had gone from the meeting. The people began to struggle out.

As Jack made his way back to the hotel he was deeply disturbed in mind. There was no moon, but the night was bright with stars. Looking up, he saw the North Star, like an old friend, looking so remote, serene and undismayed, though nations were rocking with war and hatred. The Major and his fiery eloquence were easy to turn aside, but Pte. Crowe, so pale and shaken, quivering with the horror of war, walked beside him in spirit.

The hotel that night sounded with jangling noise, shrill voices, snatches of song, bursts of harsh laughter. The Major was a prince of story-tellers. "Say, boys, did you hear this one? One of the boys who had been on leave . . . . 'Roars of laughter followed, then more beer. "Too much hard liquor is bad," laughed the Major, "but too much beer is just right. No danger of being pinched for being noisy—we have both the proprietor and the policeman. Now, listen to this. There was a French girl . . . ."

At one o'clock the party broke up. The Major had secured six names. He decided the next morning to let Private Crowe go back to the City. The kid was all right, but he lacked "pep." This was a job for a real heman, and after all, the best little recruiter apart from himself, if it ever could be considered from himself, was the amber-colored bottle. It gave just the proper warmth and glow.

Jack made his journey around by Edmonton to, Eagle Mines, arriving there on the first day of February. There had been no reply to his wire. He stepped off the train with a strangely beating heart. Helmi would be there, surely, but the platform was almost bare. Not a person whom he knew did he see as he hurried across the street and over to his own house.

The door was not locked, and he went in. A strange scene met his eyes—dirty dishes on the table, the remains of a slovenly meal; ashes from cigars on the plates; the bed showing that it had been slept in; the coffee pot was on the stove. The floor had been tramped by muddy feet and spat upon by tobacco chewers, and a forgotten pipe was on the window-sill. The air was heavy with tobacco smoke and the stale fumes of beer.

Jack's heart was heavy with apprehension. He went up to the loft by the ladder on the wall. The bed there had been used too, and a man's coat was thrown across it. There it was—the house he had built—defaced, defiled. What did it mean? He would know what it meant, he would go over to the boarding-house.

Mrs. McMann, a few minutes later, related the interview to her friend Mrs. Turner. "He bounded in at me," she said, "just when I was puttin' the potatoes on to boil. "Where's Helmi?" he almost shouted at me, without even biddin' me the time of day. How could I tell him where Helmi was? "She's not here," I says, "and I don't know where she is—she's been gone over a month," I says. "Where did she go?" he said. "To Edmonton," I said.

"Why did she go?" he stormed! Didn't she know I was coming back? "Where did she say she was going"? "Well, Helmy never confided in me, as you know," I said.

"I could! I couldn't tell him why she went. I never was one that could talk about those things. I don't believe any of my people could. The Weekes were funny that way.

"'Charm of?' he said at last, staring at me as if he didn't see me. "Sim had an accident in the mine, and went out the last train." "Well, look here, Mrs. McMann, who has been staying in my house," he says, "can you tell me that?"

"I knew very well a party of hunters had spent the night there—swells from town out deer shootin'—drunk as fools, too—I wouldn't let a dog in—"I certainly have no knowledge of what's been goin' on in your house since you've gone," I said, very stiff. Mr. McMann always said there was no one could be stiffer than I could when I wanted to be. "Do you know of anyone having stayed there?" he said. "Yes." I says, "the crazy Englishman from English Creek was there for a week, about six weeks ago."

"Lord, I thought he was goin' to strike me—but none of the Weekes was ever cowards, so I just glared back at him stiff as pork. I could give him eye for eye, let me tell you. He went out at that and over the the office. I think maybe he expected a letter from Helmy, but if she's written to him it's more than she's heard for any of us. Gone over a month and not a word from her. And I was good to that girl, though I ain't the one to tell what I've done for anyone. Now, if Jack Doran had come in a better spirit he might have heard more from me. I'm funny that way, anyone can lead me, but strong horses can't drive me."

Jack Doran went to the postoffice. His voice sounded queer to him, and his tongue felt like a piece of rope. "Are there any letters for me, Mr. Armstrong?" he asked, hoping his voice was not beating like his heart.

"Two have just come for Mrs. Doran," said the postmaster, handing them to him. "Glad to see you back to us again, Jack. People come and go at Eagle Mines—come and go—it makes it hard for a postmaster."

Jack went back to his own house—he must get under cover—the eyes of the people he met hurt him—they bored into him, twisting, turning, screwing, gouging, red-hot and sharp as ice. He must get somewhere where he could shut the door.

In his own house, Jack sat with the letters in his hand. Helmi had gone, she had not waited. He was a month late, but Helmi should have waited. Where had she gone?

The letters might tell him—it would be better to know. He opened the first one and found it contained a Government cheque for fifteen dollars payable to Helmi Doran, and it was dated on account of Pte. Arthur Warner. Jack stared at it without understanding.

The other letter was from Montreal. "Dear Helmi," it said, "I have made over my separation allowance to you, and I hope you will accept it from me. You are the only person in Canada who has any claim on me. I have paid every other person in Canada everything they have ever done for me. You, dear Helmi, I can never pay in money, for you gave me the most precious thing a man can have who goes out as I am going, a memory of something tender and sweet. I have made my will, leaving everything I have to you, I will never forget your last words to me. Nobody ever spoke to me like that before. Will you write to me, Helmi?

Ever Yours,
Arthur Warner."

(To Be Continued.)

MANY MOTHERS RECOMMEND THEM

Baby's Own Tablets Are Fine For Nervous, Sleepless Children

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant tasting little tablets that promptly relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me., "My little girl was nervous and could not sleep. I tried the tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the Tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Jap Flier Was Ambitious

Not satisfied with his first record for night flying, Captain Toshio Kato, of the Japan aviation school at Tokyo, immediately flew again and established a new record. He hopped off at 5.30 o'clock in the evening and broke by 35 minutes his previous record of six hours in the night air. He immediately flew again and remained up until 9.35 o'clock in the morning, beating his own record of the night by three hours. Most of his flying was in dense fog.

Could Hardly Live For Asthma, writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

The time to take care of the coming years is this year.

Love and potatoes must be akin—they both spring from the eyes.

CUTICURA HEALS LARGE PIMPLES

Caused Itching Burning, Also Disfigurement.

"My complexion was completely marred by pimples which varied in size. Some were large, hard and scaly, while others were just red and festered. They caused an itching, burning sensation, also disfigurement.

"After using scores of remedies for over two years, with but little results, I sent for a free sample of Cuticura Soap and Ointment. I was so pleased with the results that I purchased more, and after using two cakes of Cuticura Soap and one large box of Cuticura Ointment I was completely healed." (Signed) W. E. Blackburn, 20 Bellevue Ave., Toronto, Ont.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

WHY "NEW TEETH FOR OLD"?

Perhaps you were wondering why little sonny had to lose his "baby" teeth and have them replaced with new ones.

Why, you asked yourself, do they not remain permanently and develop in size during the growing years just as do the ears and eyes?

"Because they become decayed" you say; but not necessarily so since tooth decay is a disease and is therefore abnormal and preventable; and for that matter, when you lose a tooth through decay at six and twenty, does a new tooth replace it?

But consider: You have seen a little sapling grow to be a big tree—"large oaks from little acorns grow"—but did you ever hear tell of a small pebble growing to become a large stone? Not likely so, and for obvious reasons for, as you know, the tree is of organic matter, while the stone is of inorganic.

Now the tooth, being composed largely of inorganic matter, especially the outer enamel covering, which is almost wholly so, like the pebble, cannot of itself change in form, and so grow larger once it is fully developed.

Obviously too, sonny's little jaw has no room for the larger teeth that he will need when he is fully grown.

So unlike the potatoes that "from little ones do big ones grow" we have instead, "new teeth for old."

Those baby teeth then serve temporarily for mastication until the maxillary or jaw bones are sufficiently developed to accommodate the larger permanent teeth of adult age.

They are mother Nature's expedient, as it were, and a good expedient too, if given half a chance.

Little Helps For This Week

"Inasmuch as ye did it not to one of the least of these, ye did it not to me."—Matthew xxv. 45.

Living, thou dost not live
If mercy's spring run dry,
What Heaven has lent thee will thou freely give,
Dying, thou shalt not die.
He promised even so:
To thee His lips repeat,
Behold, the tears that soothed thy sister's woe
Have written in thy Master's feet.
—Oliver Wendell Holmes.

The final test of religion at that last day is not religiousness, but love; not what I have done, not what I have believed, but how I have discharged the common charities of life. By what we have not done—by sins of omission—we are judged. It could not be otherwise. For the withholding of love is the negation of the spirit of Christ, the proof that we never knew Him, that for us He lived in vain.
—Henry Drummond.

No matter how deep-rooted the corn may be, it must yield to Holloway's Corn Remover if used as directed.

Recipes For This Week

(By Betty Barclay)

CREAM OF ASPARAGUS SOUP

Wash each stalk of asparagus carefully with a vegetable brush to remove all grit. Then cut in small pieces (using all but the very tough parts). Cook, covered, until the asparagus is tender, in enough water to cover. Add salt to taste just before the asparagus is done. Allow two cups cooked asparagus and cooking water to 2 cups medium cream sauce (2 cups milk, 4 tablespoons flour, 4 tablespoons butter). Season and serve hot.

Note: The less tender part may be cooked longer and put through a sieve. If desired, the tops may be used for salad).

FRUIT BLISS

2-3 cup sugar.
1-3 cup water.
2 egg yolks.
4 tablespoons lemon juice.
Red color paste.
3 cups fruit.

Boil sugar and water five minutes. Pour over egg yolks, cook over hot water until thick, stirring constantly. Add lemon juice and red color paste and chill. Pour over fruit, using peaches, oranges, red cherries and strawberries cut in pieces. Serve very cold. Serves 6.

Enlisting Their Sympathy

Counsel for the victim of a motoring accident: "Gentleman of the jury, the driver of the car states he was going only four miles an hour. Think of it! Think of the agony of my client, the victim, as the car drove over his body at four miles an hour!"

"I see you are getting all the girls off your hands."

"Yes, but the worst of it is I have to keep their husbands on their feet."

Neuralgia succumbs to Minard's Liniment.

THERE is *nothing* quite equal to Aspirin for all sorts of aches and pains, but be sure it *is* Aspirin. The name Bayer should appear on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box when you buy it:

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to ensure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

Salt Essential To Health

Is One Of the Four Prime Necessities Of Life

Salt is necessary to life and health. Deprived of salt, disease and ultimate death would follow. In certain parts of the world where salt is scarce, salt is used in lieu of cash in trade and barter. Salt rubs with water, bread, sleep as one of the four prime necessities of life. A medical man stated recently that the chronic ill-health of many people is due to their undersonsumption of salt; they take too little in condiment form, and even less in vegetables, such as cabbages, which contain valuable salts.

Look at your salt-cellar. Each white grain of glistening salt is a perfect crystal. In a tiny pinch there are thousands. They will pass to every part of your body—blood, brain, tissue, and bones—and do their health-keeping work.

Wrong Idea Of Sin

More should be written about the pleasures of virtue. The old theology gave the impression that sin is delightful and that those who forego it give up what is most thrilling in life.—American Magazine.

Minard's Liniment for Toothache.

"Let's look at this budget sensibly, John."

"But you can't save money even on paper."

"But I do. I got fifteen sheets of paper for 10 cents today."

Why
Firestone
Tires Give Most Miles Per Dollar

The greatest enemy to tire life is *not* the harsh grind of city streets or rough roads, but *heat* which is created inside the tire by internal friction. Heat not only weakens the fabric, but also softens the rubber, causing blowouts and tire failures.

The above illustration shows a single cord of a Firestone tire greatly magnified and untwisted into fifteen smaller cords composed of many little fibres.

By means of the exclusive Firestone Gum-Dipping process, every fibre is insulated with rubber, which prevents internal heat and friction.

Your local Firestone Dealer gives you the better service that goes with these better tires. See him today.

Protection

YOUR valuables should be protected. A disastrous fire can take them in a flash—and in a few minutes the accumulation of years of effort is wiped out.

All our Branches maintain a Safety Deposit Department. For a very small annual rental your valuables are securely guarded within walls of masonry and steel.
